

LLM Engineering

MASTER AI & LARGE LANGUAGE MODELS

YOUR 8 WEEK JOURNEY TO MASTERY

You'll build and extend 8 real world projects including

Customer Support Agent

Multi-Modal App with Agents

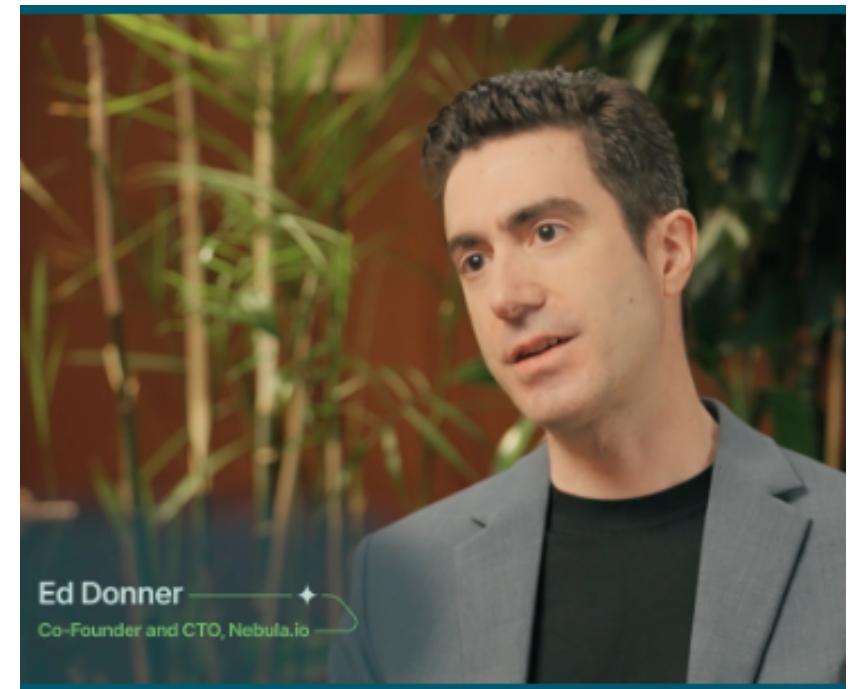

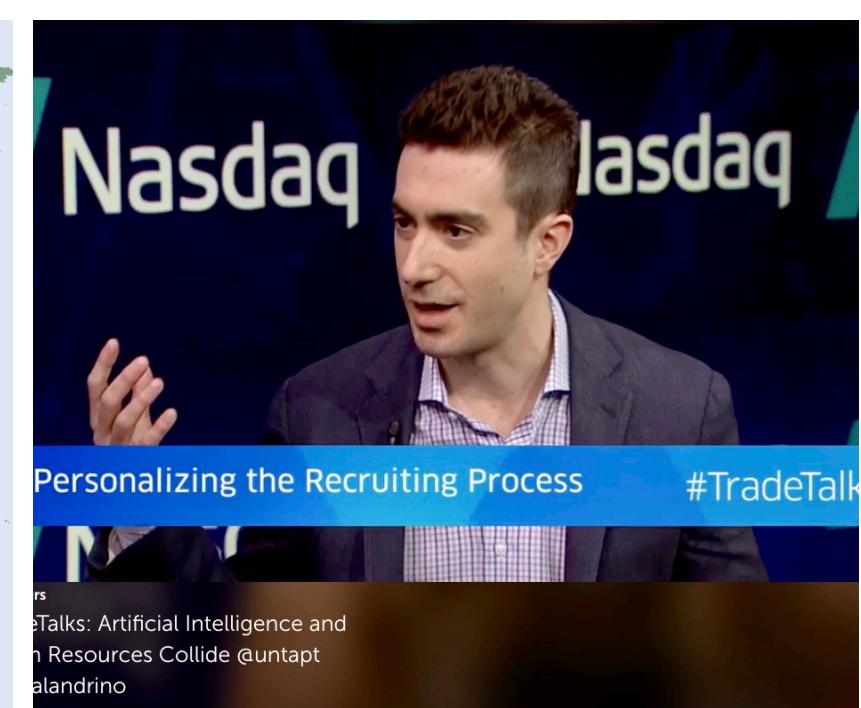

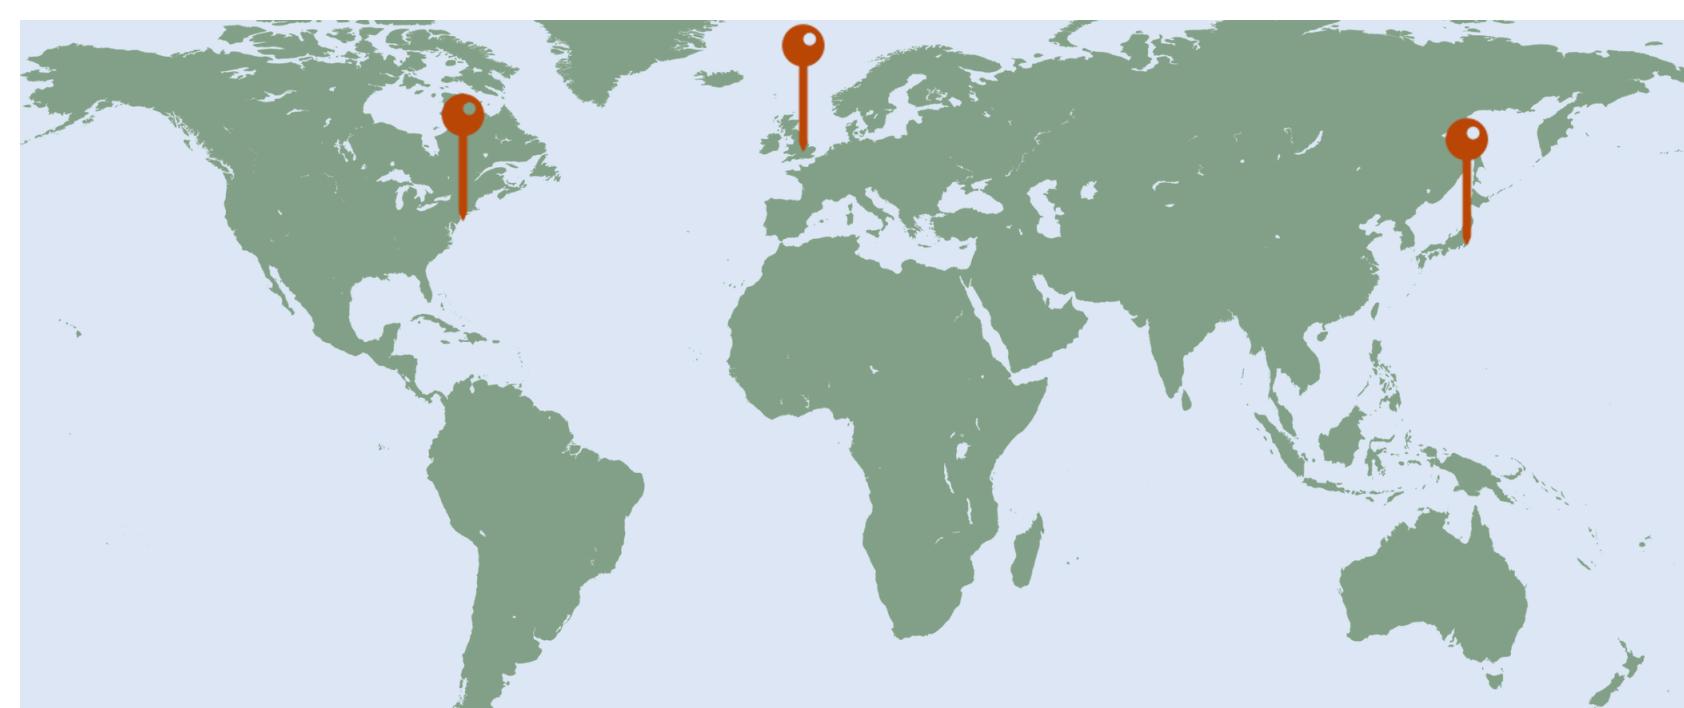

Expert Consultant

Retrieval Augmented Generation (RAG)

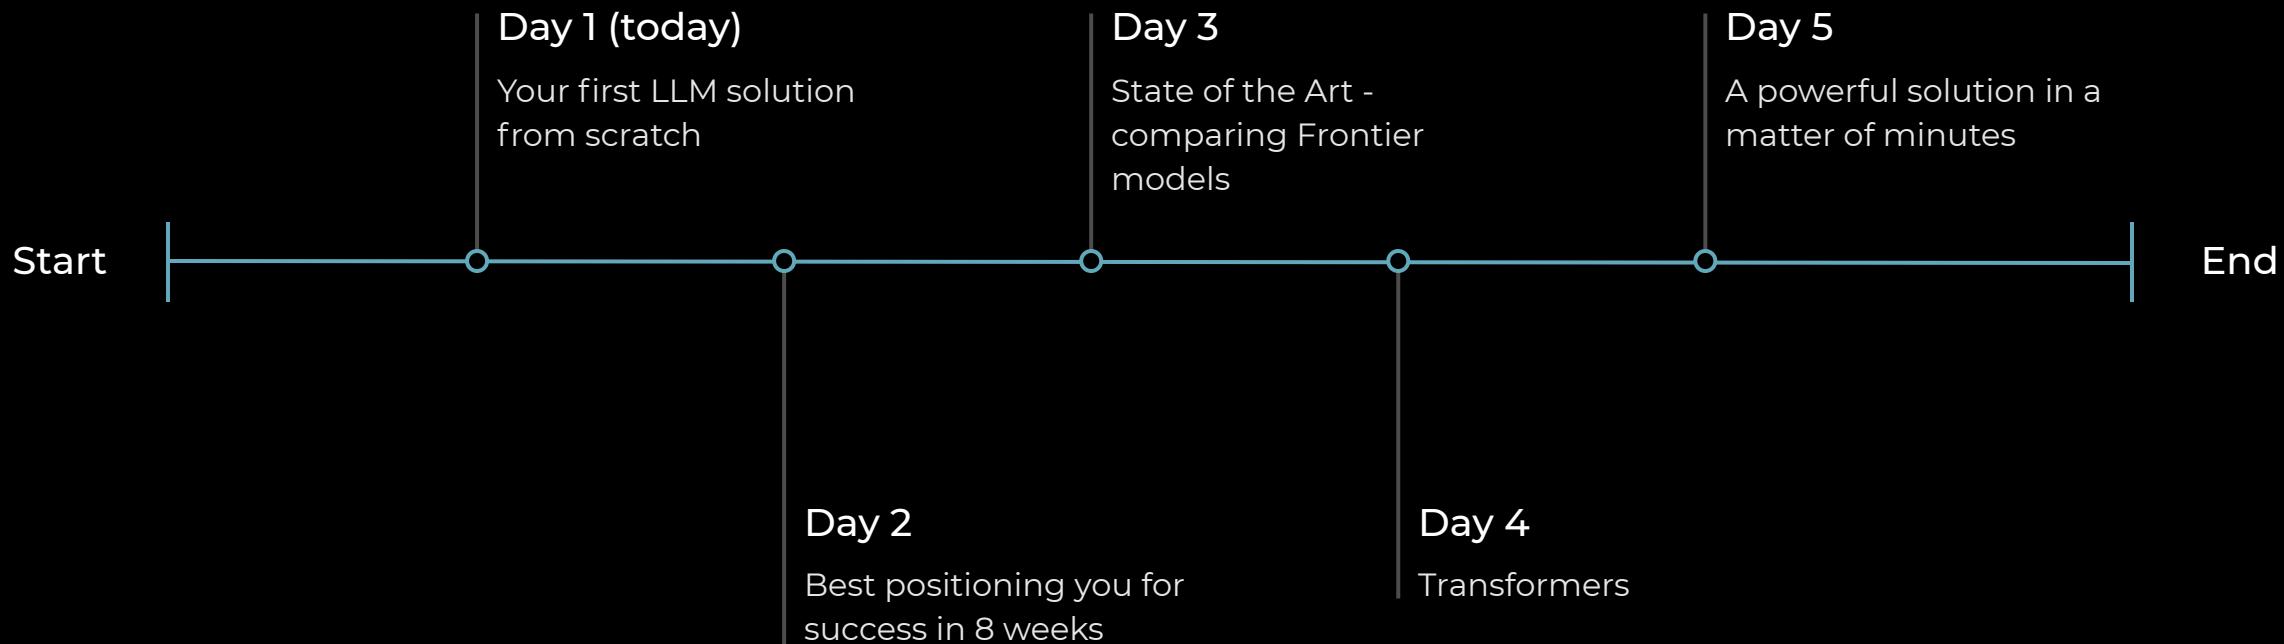

Price Predictor

Fine-tuning with QLoRA

How you will level up in Week 1

You will understand Frontier Models and their APIs and will have coded your own solutions

INSTANT GRATIFICATION

Today you will build your first LLM solution using a Frontier Model

Get ready to make your own LLM solution

Step 1

Clone the repo

Step 2

Follow the instructions in the README

Step 3

Create an OpenAI key

LET'S DO THIS!!

00:10

Your journey is just beginning but you're
Already 2.5% to mastery!

What you can do ALREADY

- Write code to call OpenAI's frontier models
- Distinguish between the System and User prompt
- Summarization

What you'll be able to do TOMORROW

- Know exactly the steps to get to LLM mastery
- Be set up for success
- Recognize the leading Frontier Models and how to use them
